PROPOSITION 65 NOTICES

October 27, 2017

The California "Safe Drinking Water and Toxic Enforcement Act of 1986" commonly known as "PROPOSITION 65" includes a list of chemicals known to the State of California to cause cancer or reproductive toxicity.

Nylene polymer resins are not known to contain any of the substance included in the PROPOSITION 65 list, as updated on October 27, 2017 by the California Office of Environmental Health Hazard Assessment.

Since these substances are not expected to be present in Nylene products, we do not test for their presence or require our raw material suppliers to do so. It is the responsibility of the manufacturer of the final products to determine the compliance of their products with PROPOSITION 65 requirements.

For further information, please contact our Customer Service Department at 973-694-4141.
